## THE SLEEP ACTIVITY MONITOR

SAMi® is a video-based sleep activity monitor for parents, caregivers and individuals that need to watch carefully for unusual movements at night.

Discount Code for 10%  
off any SAMi order:  
SHINE10

Reduce the risk of SUDEP while  
automatically capturing a recorded  
history of nocturnal behavior

Place SAMi  
bedside

SAMi streams to  
your Apple device

### DETECT

The SAMi Camera  
monitors for unusual  
activity

### ALERT

When abnormal  
movement is detected,  
SAMi triggers a loud  
alarm, and provides a  
live view for the  
caregiver

### RECORD

SAMi automatically  
captures and saves HD  
video/audio of the event  
(in case you wish to  
review with your care  
provider)

THE SLEEP ACTIVITY MONITOR

## A word from Laura, the President and Co-founder of the SHINE Syndrome Foundation

"Our foundation is a nonprofit whose mission is to improve the quality of life for children and families impacted by SHINE Syndrome through supporting collaborative research among international medical professionals, nurturing a family community, and raising worldwide awareness. The E in SHINE stands for epilepsy; many of our patients have seizures with a large number of these seizures occurring during sleep.

My son is a SHINE patient and had his first seizure at the age of four. We tried several different monitoring devices over the next several months and none of them worked as advertised. Either alarms were going off when he wasn't seizing or these devices were missing seizures. Another epilepsy mom told me about the SAMi camera and sent me some videos it had captured of her daughter during sleep and we ordered one immediately.

The SAMi is by far the best seizure monitoring device we have used as a family. Not only do we feel confident that we are alerted to every seizure, but we also have excellent-quality videos to send to our son's neurologist. The video recordings from SAMi have been used to diagnose new seizure types and make treatment changes without having to do an inpatient EEG.

Most importantly, we are confident that the SAMi system has saved our son's life multiple times. We are thankful for this consistent, reliable alerting system that allows us to sleep peacefully knowing our son is safe. Thank you, SAMi, for an excellent product that gives epilepsy parents peace of mind."

# About SAMi

## Product:

- Can monitor virtually any kind of movement
- Appropriate for all ages (babies to elderly!)
- Designed by parents of a child with Epilepsy specifically with parents & caregivers in mind.
- Only movement monitor that automatically captures video/audio recordings so their doctor can see and hear exactly what happens.

## Company:

- Woman owned business!
- Operating for 10 years + thousands of customers globally
- Reputation as the most reliable movement monitor of its kind
- Backed by the Epilepsy Foundation, and we're the preferred movement monitor for nearly 50 organizations that support families with Epilepsy, Autism, Cerebral Palsy, and many other disorders.

*"The SAMi The Sleep Activity Monitor has been an excellent option for many families... Imagine being able to show your neurologist or epileptologist exactly what is happening at night."*

- Julie Hutchison, President  
The Chelsea Hutchinson Foundation

SAMi is recommended by over **50 leading Epilepsy Organizations**

...and Neurologists and Epileptologists all around the world!

"We have been amazed at the SAMi's ability to catch the nocturnal non-convulsive seizures that other monitors would miss!"

- Denise L. in Alabama (Sept 14th, 2022)

"My daughter suffers from epilepsy and now with the camera in place we are fully aware of each seizure Delighted with the SAMi-3. Well worth the money to get peace of mind."

- Esther in Scotland (Jan 8, 2022)
